

EXPERIMENT – 5

Building Reports and Applying Filters in Zoho Creator

Project Title: Recruitment & Job Application Management

Details	Information
Student Name	Lalitha B
Roll Number	241401045
Department	CSBS
Experiment Number	5
Platform	Zoho Creator
Application Name	Recruitment & Job Application Management

1. Aim

To create and configure a report in Zoho Creator for viewing, organizing, and filtering job applications submitted through the existing Job Application Form.

2. Problem Statement

Managing multiple job applications manually can make it difficult for HR teams to review candidate details and identify suitable applicants. Zoho Creator provides reporting and filtering features to simplify candidate management.

3. Procedure

Step 1: Opening the Application

1. Log in to Zoho Creator.
2. Open the existing Recruitment & Job Application Management application.
3. Navigate to the All Job Applications report.

Step 2: Viewing Submitted Applications

1. Open the All Job Applications report.

2. View the submitted candidate records.
3. Check details such as candidate name, email, contact number, department, and work experience.

Step 3: Configuring Report Filters

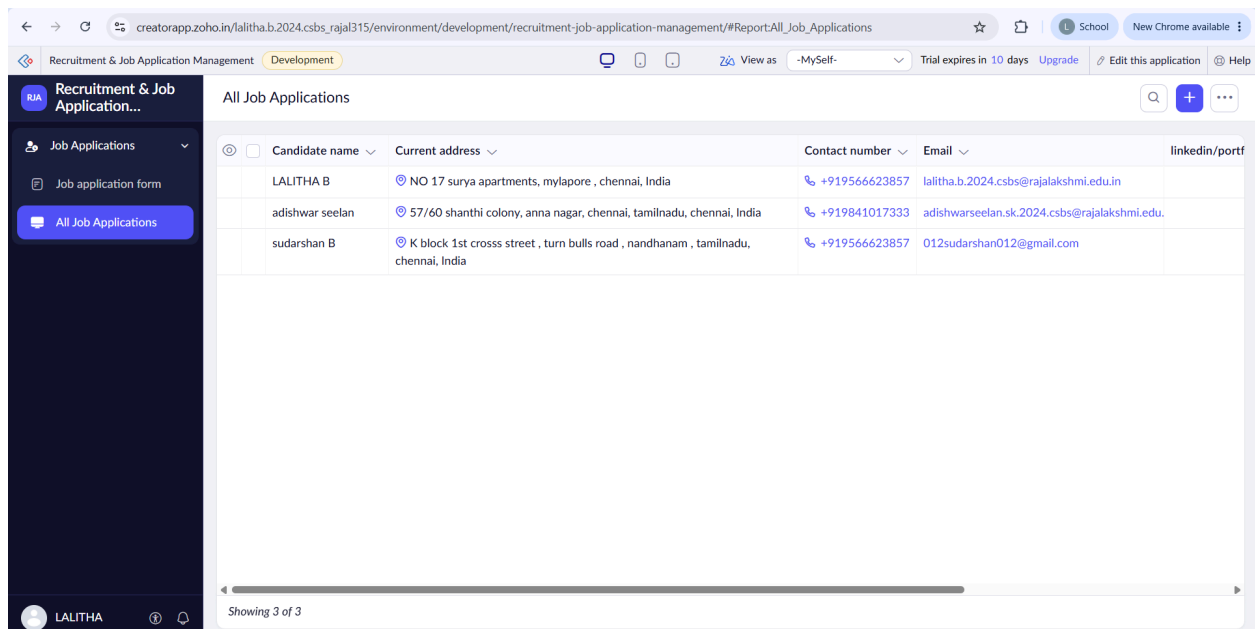

1. Open the application builder.
2. Select the All Job Applications report.
3. Navigate to the report filter settings.
4. Add filters based on Department Applied For and Years of Experience.
5. Save the configurations.

Step 4: Applying Filters

1. Open the All Job Applications report.
2. Select the required filter criteria.
3. Apply the filters to display matching candidate records.
4. Verify that the report displays the relevant applications.

4. Output

Screenshot 1 – Viewing All Job Applications

Candidate name	Current address	Contact number	Email	linkedin/portf
LALITHA B	NO 17 surya apartments, mylapore , chennai, India	+919566623857	lalitha.b.2024.csbs@rajalakshmi.edu.in	
adishwar seelan	57/60 shanthi colony, anna nagar, chennai, tamilnadu, chennai, India	+919841017333	adishwarseelan.sk.2024.csbs@rajalakshmi.edu.	
sudarshan B	K block 1st crosss street , turn bulls road , nandhanam , tamilnadu, chennai, India	+919566623857	012sudarshan012@gmail.com	

Figure 1: All Job Applications report displaying the submitted candidate records.

Screenshot 2 – Configuring Report Filters

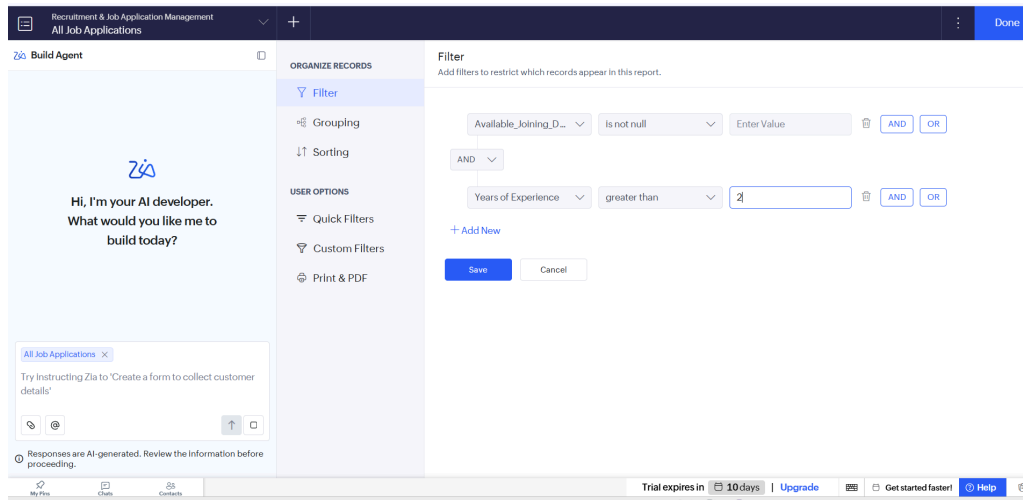

Figure 2: Configuring filters in the All Job Applications report.

Screenshot 3 – Result from Report Filters

The screenshot shows the result of the report filters. The table displays two candidate applications: 'adishwar seelan' and 'LALITHA B'. The table has columns for Candidate name, Current address, Contact number, Email, and linkedin/portfolio.

Candidate name	Current address	Contact number	Email	linkedin/portfolio
adishwar seelan	57/60 shanthi colony, anna nagar, chennai, tamilnadu, chennai, India	+919841017333	adishwarseelan.sk.2024.csbs@rajalakshmi.edu.	
LALITHA B	NO 17 surya apartments, mylapore , chennai, India	+919566623857	lalitha.b.2024.csbs@rajalakshmi.edu.in	

Figure 3: Displaying relevant candidate applications according to the filters

5. Result

The All Job Applications report was successfully configured in Zoho Creator. The report displays submitted candidate details and supports filtering based on selected criteria, making it easier to view and manage job applications.

6. Conclusion

This experiment demonstrates how Zoho Creator's reporting and filtering features help organize and retrieve candidate information efficiently. It simplifies the recruitment process by allowing HR teams to review applications based on specific requirements.
